

EXISTING CONDITIONS

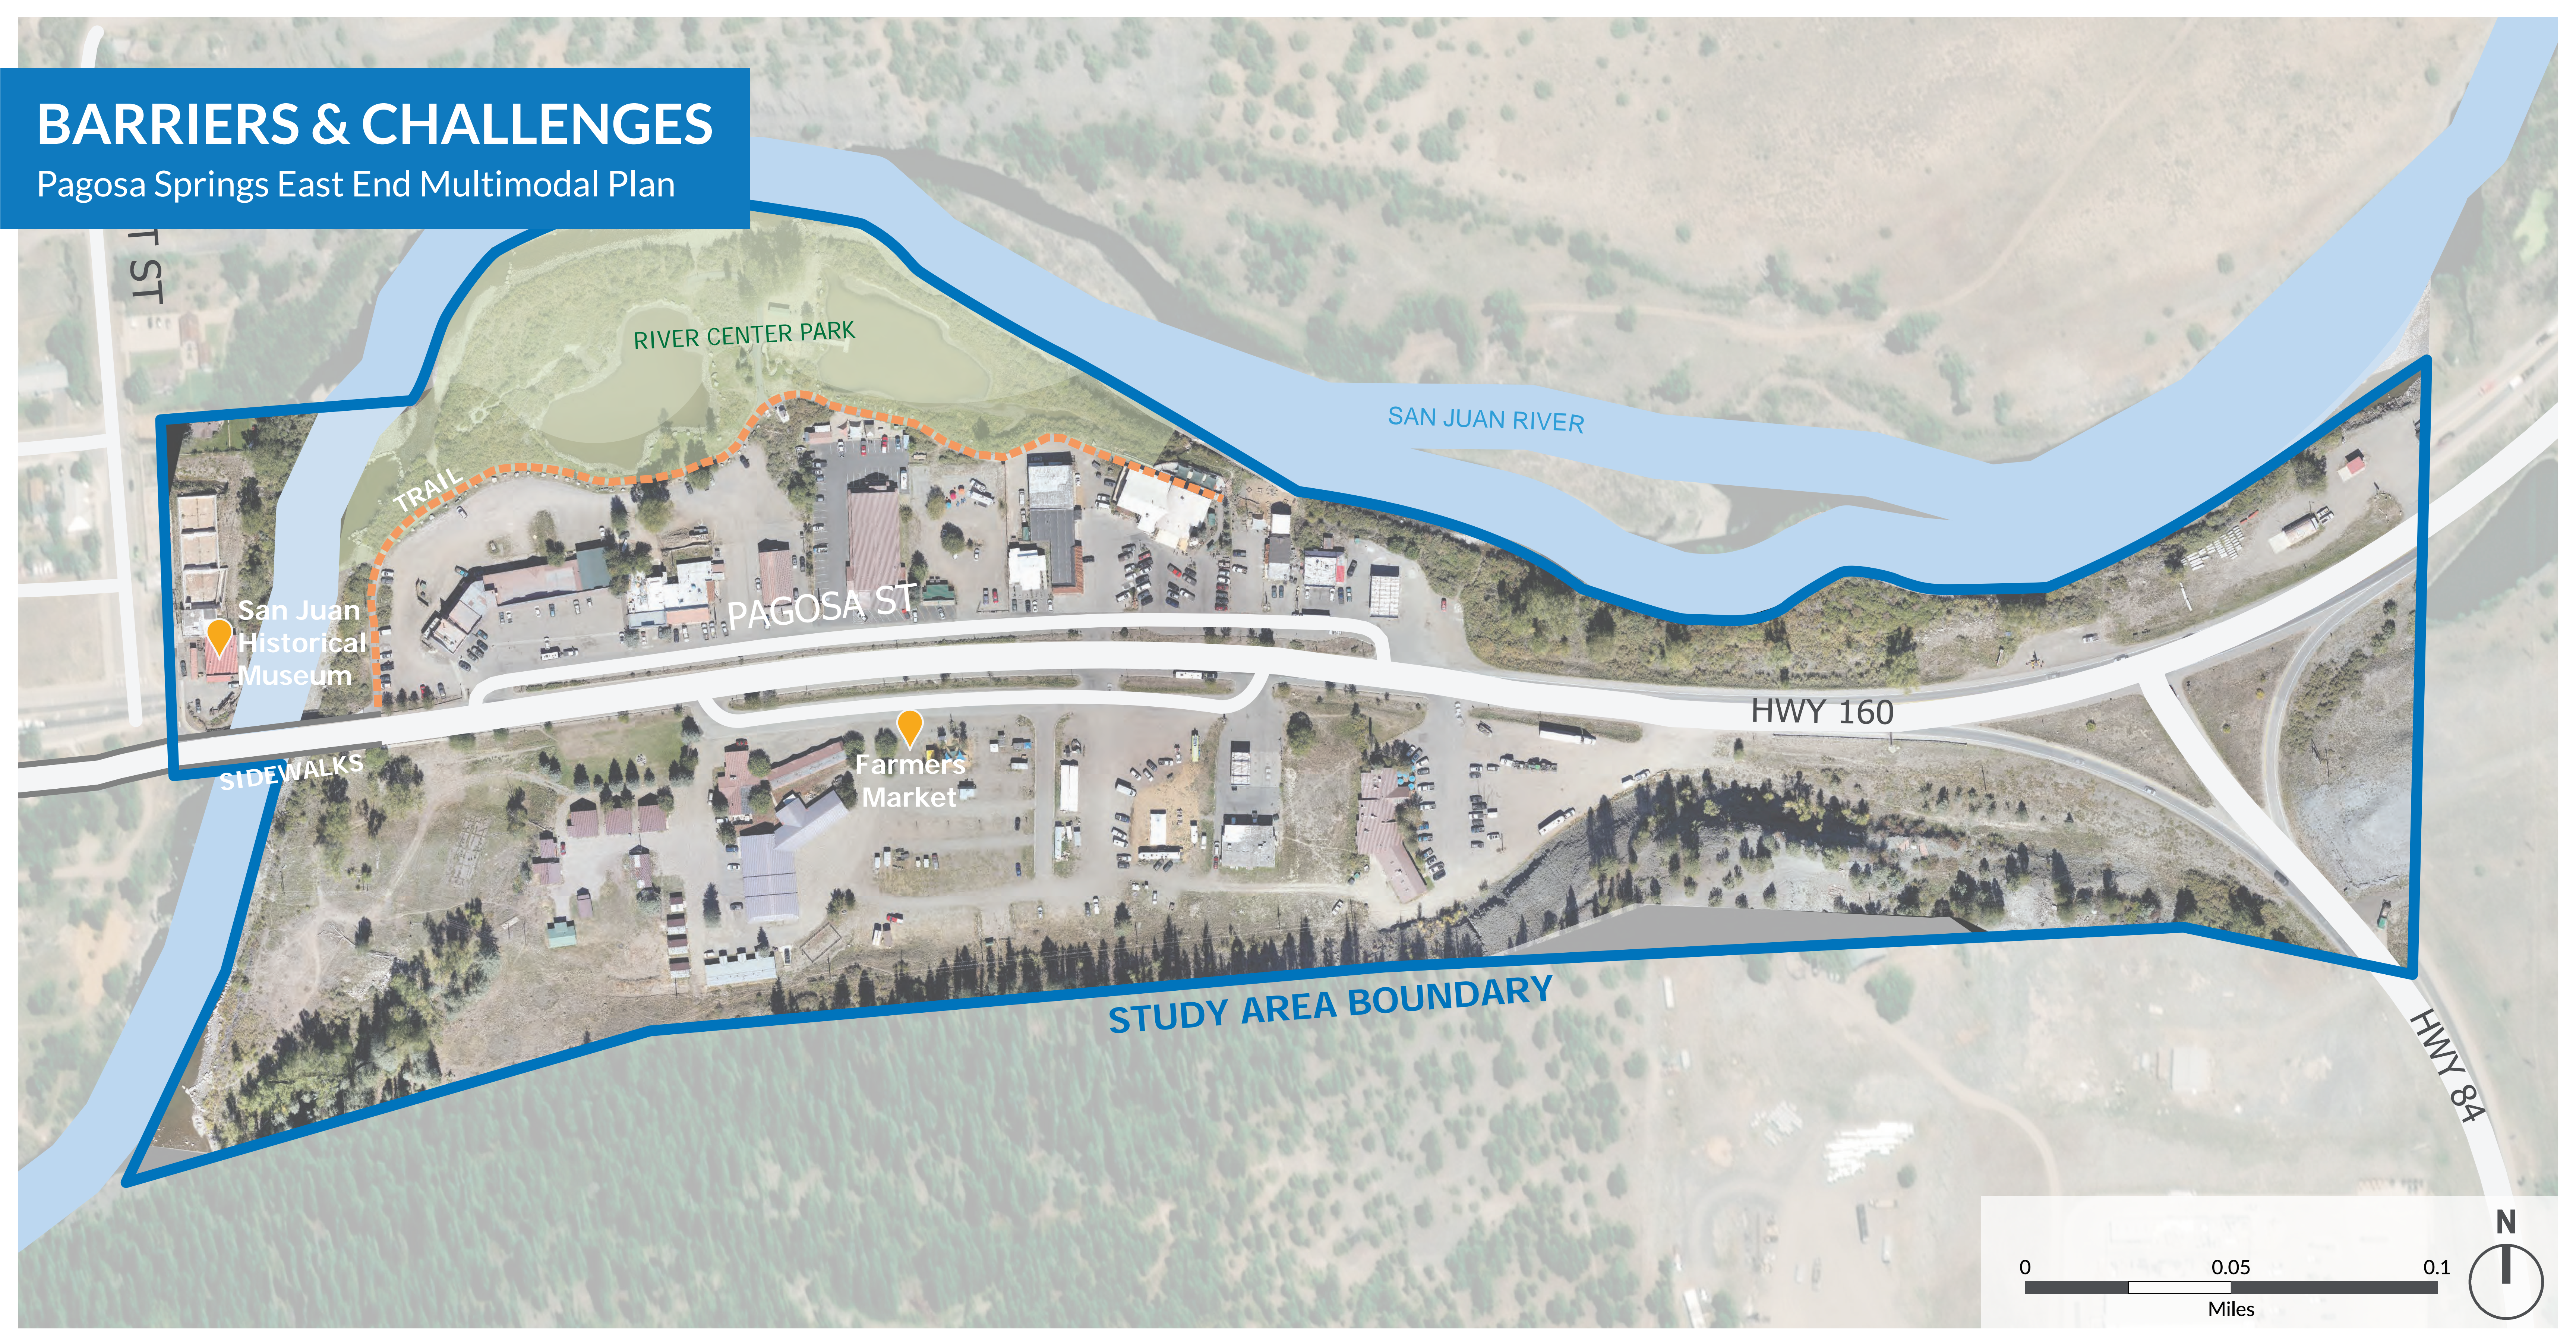

Pagosa Springs East End Multimodal Plan

The East End Multimodal Plan study area expands between the San Juan River and east of the Highway 84 Junction. We want to re-envision how traffic and people move through the area and how we can better connect it to downtown, future growth to the east, the San Juan River, River Center Park, and Reservoir Hill Park. The next few stations will ask for you to help us identify challenges, barriers, and opportunities, but start by taking a look at our study area as it is today.

BARRIERS & CHALLENGES

Pagosa Springs East End Multimodal Plan

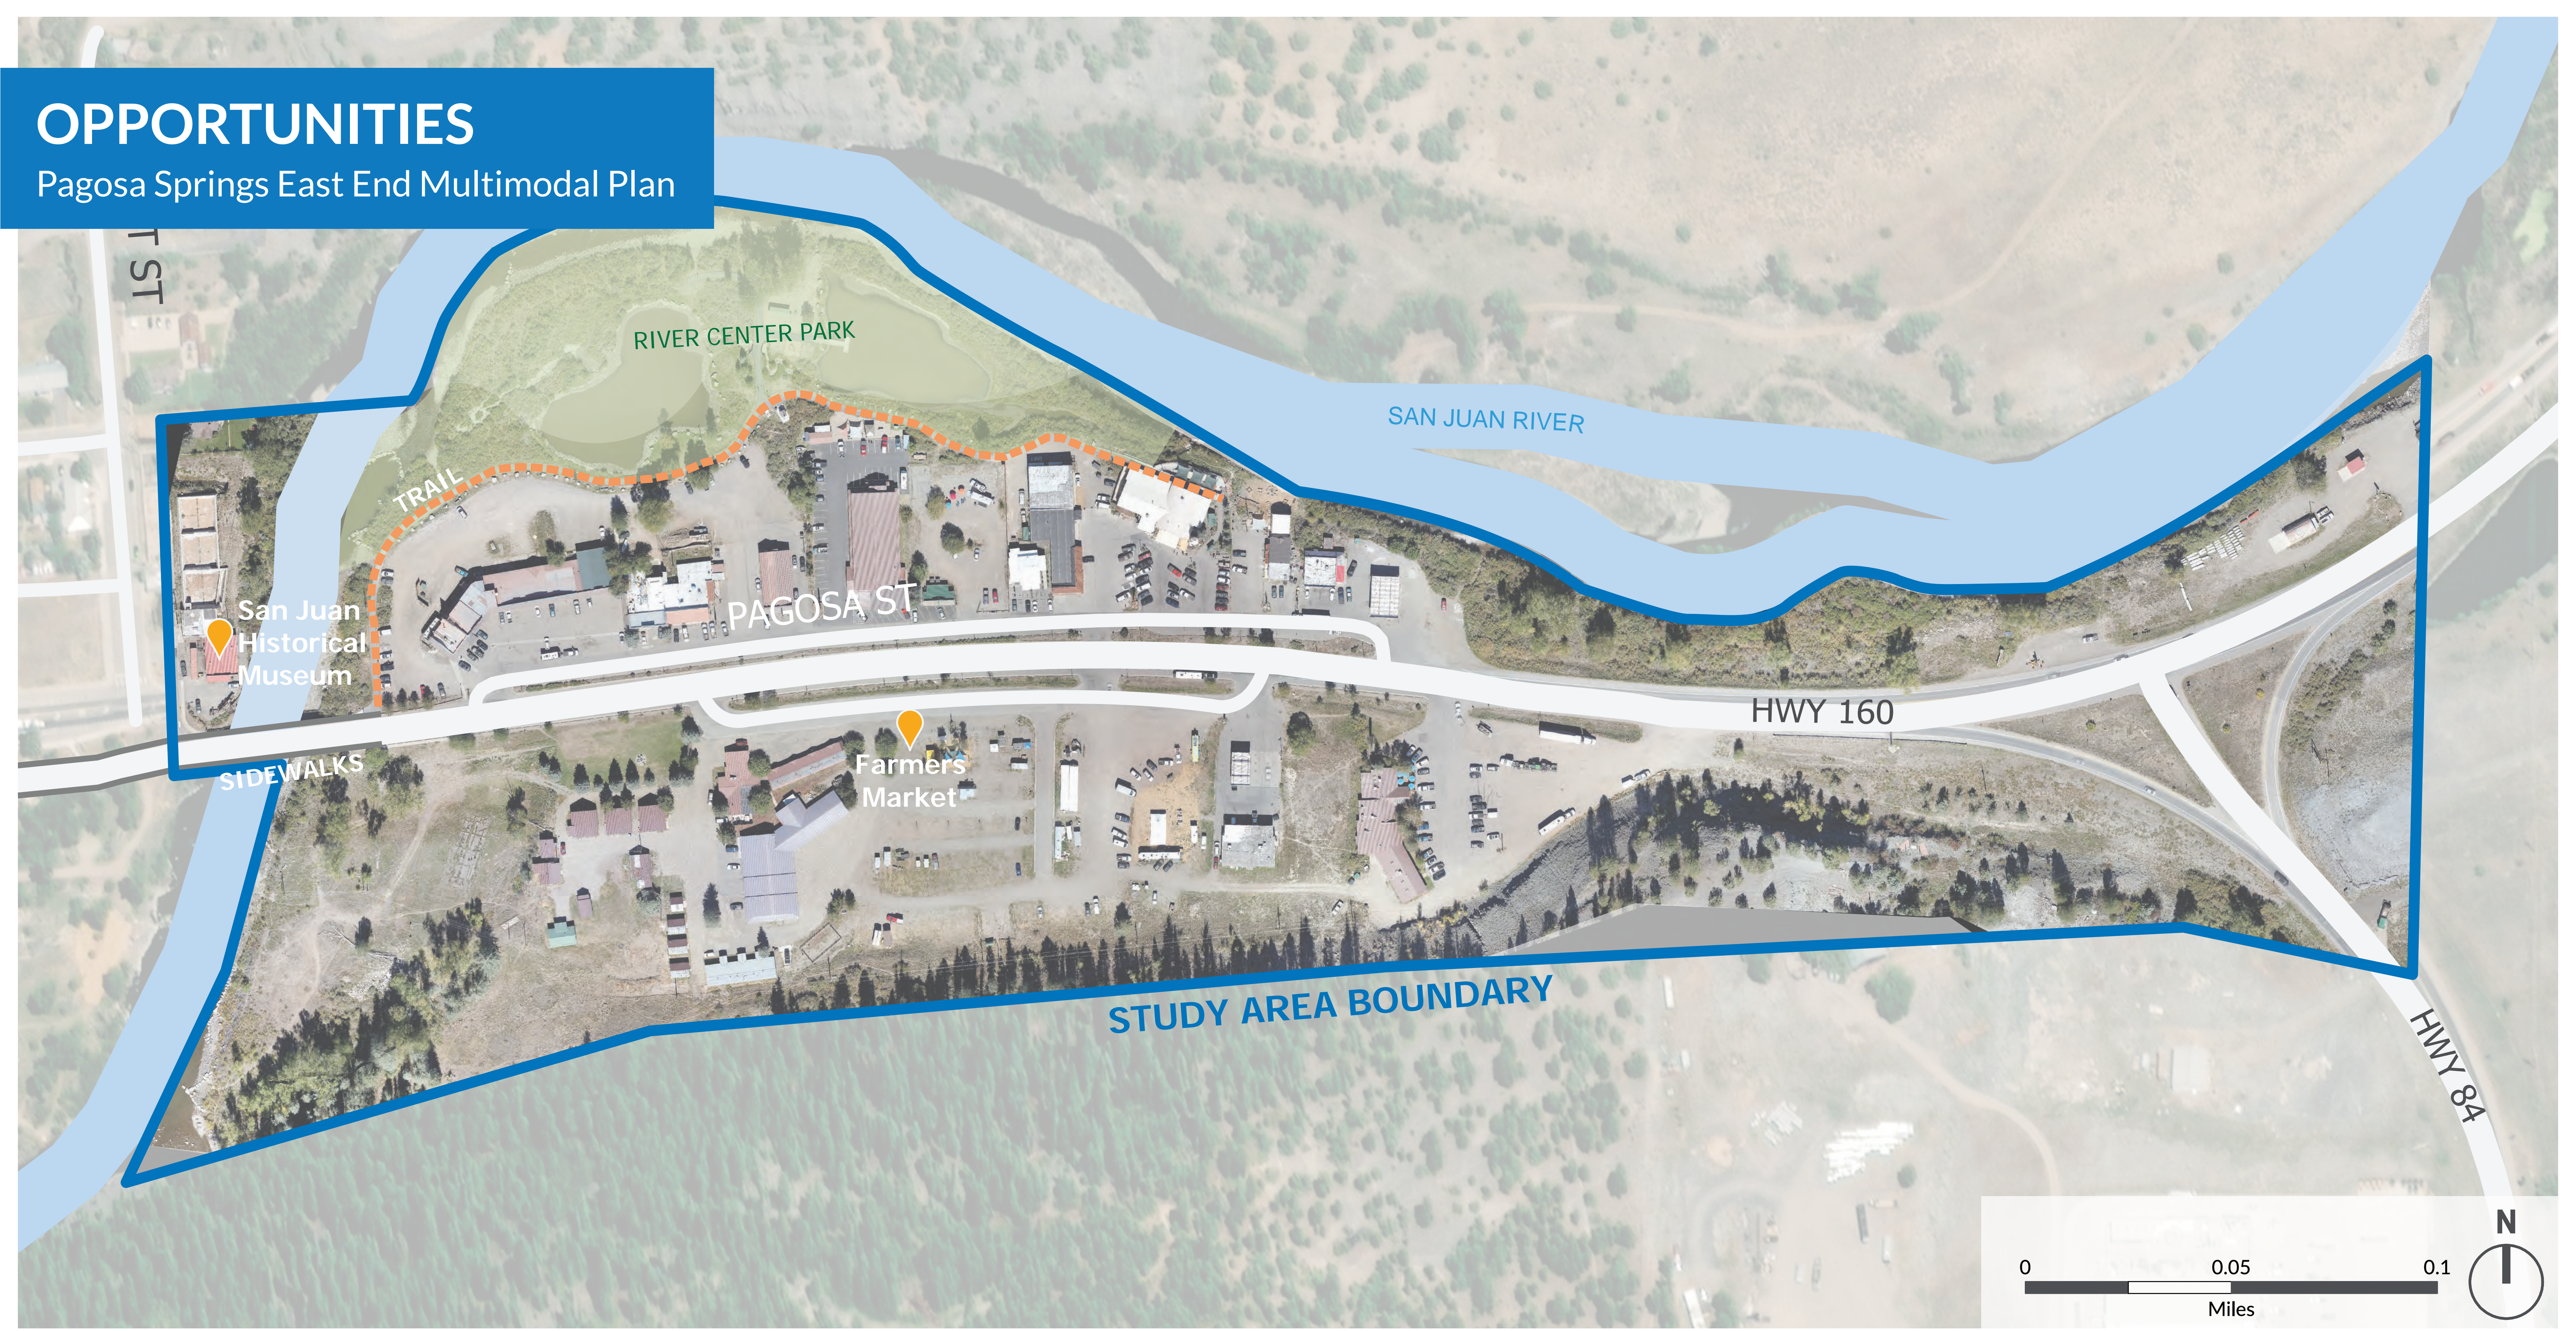

Traffic congestion and vehicular backups, lack of sidewalks, dangerous biking conditions, parking issues, among others are all types of potential barriers. Help us identify what those are in the East End.

Instructions: use sticky notes to help us identify barriers and challenges on the map, or place your general comment sticky note here.

OPPORTUNITIES

Pagosa Springs East End Multimodal Plan

What do you think are some great opportunities for the East End? Help us generate some ideas for the future!

Instructions: use sticky notes to help us identify potential opportunities on the map, or place your general comment sticky note here.

EAST END SITE PHOTOS

Pagosa Springs East End Multimodal Plan

Heavy traffic and difficult walking conditions.

The Highway 160 bridge across the San Juan river presents challenges for people walking and biking.

Minimal separation between parking areas and frontage road.

Pagosa Springs Farmers Market in East End.

Existing public parking at River Center Park.

River Center Park provides ideal space for river access and recreation.

TYPES OF AMENITIES

Pagosa Springs East End Multimodal Plan

Waterfront Access

Pagosa Springs, CO

Waterfront access that accommodates many different activities at different ability levels.

Trails

Glenwood Springs, CO

Trails that can be used for both recreation and transportation throughout the community.

Public Parking

Queens, NY

Formalized public parking that is organized and landscaped to blend in with the East End.

Public Art/Identity Features

Greenwood Village, CO

Public art that brings visual interest to the East End.

Multimodal Roadways

Jackson Hole, WY

Separated bike lanes and wide sidewalks make for a comfortable multimodal experience.

Event Spaces

Hillsborough, NC

Permanent events space that can accommodate events year-round.

Safe Highway Crossing

Asheville, NC

Pedestrian refuge as well as yield signage, bold crosswalk markings, and a bike lane incorporated.

MY VISION FOR PAGOSA SPRINGS' EAST END IS...

TOP PRIORITIES
